## EDUCATION

### Emory University, College of Arts & Sciences

Bachelor of Science, Mathematics/Computer Science, Minor: Music  
Cumulative GPA: 3.6/4.0

Atlanta, GA  
May 2026

**Relevant Courses:** Data Structs. and Alg., Comp. Arch., Algorithms, Lin. Alg., ML, Comp. Ling., Data Mining, Practicum, Numerical Analysis, Linear optimization, Math Stats I

## PROJECTS

### Odyssey • [github/Emory-Hack4Impact/Odyssey](#)

- Developed full-stack features for Odyssey Family Counseling Center's internal HR employee management platform
- Collaborated in biweekly agile meetings to review product backlog, design decisions, and development progress
- Technologies: React, Next.js, TypeScript, HTML, Tailwind CSS, Prisma, Supabase, Chrome Developer Tools

### Personal Website (WIP) • [calebj04.github.io](#)

- Self-taught React, TypeScript, and Vite to build a personal website for showcasing projects to employers
- Built a responsive card layout with React, HTML5, and CSS3, featuring glassmorphism and custom animations
- Designed modular, reusable React components to dynamically render projects and skills, improving maintainability.
- Technologies: React, TypeScript, Vite, HTML, TailwindCSS, Chrome Developer Tools

### Braincheck • [github.com/Tofudog/Brain-Check](#)

- Built a minimalist mobile data-tracking app, designed UI/UX in Figma and implemented the full stack in React Native
- Integrated Python and Matplotlib pipelines for data processing and visualization during development
- Technologies: Figma, React Native, XCode, Python, Matplotlib

### Decision • [github.com/calebj04/Decision](#)

- Built a custom decision tree model from first principles using machine learning and data mining techniques.
- Leveraged 12 clinical features to classify heart disease, achieving 96.67% accuracy on a dataset of 300+ patients.
- Technologies: Python, PyCharm, Google Colab

## LEADERSHIP & COMMUNITY INVOLVEMENT

### Hack4Impact Project Engineer

Oct. 2025 – Present

- Developed software for mission-driven nonprofit, working with Odyssey to implement dashboard requirements
- Worked with an 8-person engineering team on system design and user-driven iteration across 12 sprints

### AI Data Lab, Team Member

Sep. 2025 – Present

- Collaborated with a 3-person team to analyze an NFL kicker dataset of over 12,000 instances and 20 features
- Built ML models including Neural Networks, Logistic Regression, XGBoost, to predict long-term career success
- Mentored junior members in Python, covering data processing with Pandas and model development in PyTorch

## EXPERIENCE

### Emory University

Atlanta, GA

#### Technology Consultant (Cox Computing Center)

Aug. 2024 – Present

- Assisted an average 10+ clients in hardware tech support, facilitating poster printing, configuring Mac workstations, and troubleshooting Crestron displays
- Continually ensured cleanliness of study spaces allowing for a more efficient and enjoyable work environment

### Camp Westminster

Conyers, GA

#### Head Senior Counselor

Summer 2025

- Guided and mentored 10 senior counselors responsible for supporting over 800 campers throughout the summer
- Collaborated with 3 head staff members to lead 50+ counselors and coordinate operations across 7 weeks of camp

## ADDITIONAL INFORMATION

**Other Activities:** Reformed University Fellowship Lead Pianist, Camp Westminster Ropes Specialist

**Skills:** Java, TypeScript, Node.js, Next.js, React, HTML, CSS, Prisma, Pandas, NumPy, PyTorch, Docker, GitHub, LaTeX

**Interests:** Piano, Music composition, Desmos, Cooking (Brazilian), Portuguese (conversational)
